

# NEW! Round Staple-in Tube for Boat Tops and Marine Applications

1.25" Diameter, for Stationary Tops like Biminies and T-Tops

**Bright Dip Anodized**

Patent Pending

- Similar strength characteristics to 1-1/4" diameter, 16 gauge stainless steel and 1-1/4" diameter, 1/8" sidewall aluminum.
- Bright dip anodized for a polished look and maximum corrosion resistance. (Of course, can be produced in mill finish, at lower cost, on request.)
- The staple channel opening is the same as all Steel Stitch extrusions, ensuring compatibility with Steel Stitch Fabric ZipStrip and PVC ZipStrip.
- Can be bent by three wheel roller benders (like the Steel Stitch PRB3000 and the Astrup bender) to very tight radii in the 12" range. (Requires dies wide enough for the 1-1/4" diameter).

Exclusively from Steel Stitch™ and The Astrup Company

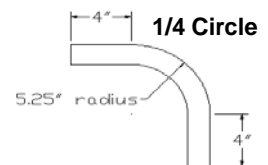

Steel Stitch Item #: 9125RBA  
Astrup Item #: 250046  
Standard Pkg: min. 1 piece  
Length: 25-ft.  
Shipping Weight (per piece): 18.25-lbs.

### Pre-formed 5.25" Radii for T-Top Corners

#### 1/4 Circle
